

CO-5-CLASS ACTIVITY-FILE CREATION

2Q-create a program to read the content and display on the console

```
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter content: ");
        String data = sc.nextLine();

        System.out.println("Content is:");
        System.out.println(data);

        sc.close();
    }
}
```

}

The image shows a screenshot of a Java IDE with a dark theme. The editor window on the left is titled 'Main.java' and contains the following code:

```
1 import java.util.Scanner;
2
3 public class Main {
4     public static void main(String[] args) {
5
6         Scanner sc = new Scanner(System.in);
7
8         System.out.print("Enter content: ");
9         String data = sc.nextLine();
10
11         System.out.println("Content is:");
12         System.out.println(data);
13
14         sc.close();
15     }
16 }
```

A blue 'Run' button is located to the right of the code editor. The output window on the right is titled 'Output' and shows the following text:

```
Enter content: hello java
Content is:
hello java

=== Code Execution Successful ===
```

There are icons for sharing and a menu in the top right corner of the output window.
