

Create a program to copy the content from the file

```
import java.io.*;

public class Main {

    public static void main(String[] args) {

        try {

            FileReader fr = new FileReader("input.txt");

            FileWriter fw = new FileWriter("output.txt");

            int ch;

            while ((ch = fr.read()) != -1) {

                fw.write(ch);

            }

            fr.close();

            fw.close();

            System.out.println("File copied successfully");

        } catch (Exception e) {

            System.out.println("Error");

        }

    }

}
```

Main.java

Run

```
1 import java.io.*;
2
3 public class Main {
4     public static void main(String[] args) {
5         try {
6             FileWriter f = new FileWriter("input.txt");
7             f.write("Hello Sreekanth");
8             f.close();
9
10            FileReader r = new FileReader("input.txt");
11            FileWriter w = new FileWriter("output.txt");
12
13            int c;
14            while ((c = r.read()) != -1)
15                w.write(c);
16
17            r.close();
18            w.close();
19
20            System.out.println("File copied successfully");
21        } catch (Exception e) {
22            System.out.println(e);
23        }
24    }
25 }
```

Output

File copied successfully

=== Code Execution Successful ===
